**Vocabulary**

• Translation	Slide	• Congruent	same size & shape
• Reflection	Flip	• Similar	
• Rotation	Spin	• Pre-Image	original image
• Dilations		• Image	transformed image

**Translations:**

Graph the image of each figure under the given translation.

1  $(x, y) \rightarrow (x-3, y+2)$

left 3  
up 2

left/right  
up + down

2  $(x, y) \rightarrow (x-1, y-1)$

left 1  
down 1

The blue figure is a translation image of the black figure. Write a rule to describe each translation.

3

left 1  
up 1

image  
preimage

$(x, y) \rightarrow (x-1, y+1)$

4

right 4  
up 3

image  
preimage

$(x, y) \rightarrow (x+4, y+3)$

5. ABC has vertices A (-3, -4), B (-2, 1), and C (2, -3). What are the vertices of the image of ABC under the translation  $(x, y) \rightarrow (x + 3, y - 2)$  and then one unit left and two units down?

$$\begin{aligned}
 A (-3, -4) &\xrightarrow{+3, -2} (0, -6) \rightarrow (-1, -8) \\
 B (-2, 1) &\rightarrow (1, -1) \rightarrow (0, -3) \\
 C (2, -3) &\rightarrow (5, -5) \rightarrow (4, -7)
 \end{aligned}$$

6. DEFG has vertices D (-5, -4), E (3, 6), F (0, 4), and G (2, -2). What are the vertices of D'E'F'G' after a translation four units left and two units down, then one unit right and four units down?

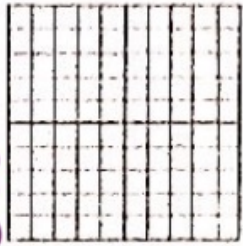

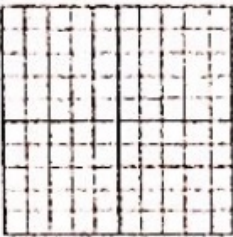

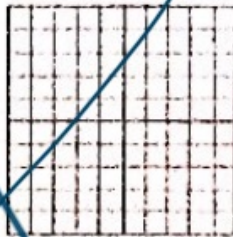

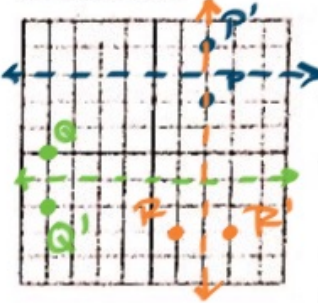

$$\begin{aligned}
 D (-5, -4) &\xrightarrow{-4, -2} (-9, -6) \xrightarrow{+1, -4} (-8, -10) \\
 E (3, 6) &\rightarrow (-1, 4) \rightarrow (0, 0) \\
 F (0, 4) &\rightarrow (-4, 2) \rightarrow (-3, -2) \\
 G (2, -2) &\rightarrow (-2, -4) \rightarrow (-1, -8)
 \end{aligned}$$
